Name _____ Period _____ Date _____

The Siamese Cat Mystery

Focus question: Why are a Siamese cat's ears, paws, and tail dark?

Vocabulary

Word	Definition (my words)	This reminds me of… (connections)	Example	Drawing
DNA				
gene				
protein				

Glue in: Siamese cat data

Glue the Day 1 “Siamese cat data” half-sheet here.

Name _____ Period _____ Date _____

The Siamese Cat Mystery (continued)

SketchNotes: DNA to Proteins

Draw DNA, a gene, and a protein with a short label and a simple icon for each. No full sentences.

Sensemaking: The Siamese Cat Path

Draw the cat. Add one idea about why its ears, paws, and tail are dark. Keep adding after each lesson.

Exit Ticket

Glue in: Reading: DNA, genes, and chromosomes

Glue the Day 1 “Reading: DNA, genes, and chromosomes” strip here.

Name _____ Period _____ Date _____

What Is DNA Made Of?

Focus question: What is DNA made of?

Vocabulary

Word	Definition (my words)	This reminds me of… (connections)	Example	Drawing
nucleotide				
base				
double helix				

Glue in: Reading: What is DNA made of?

Glue the Day 2 “Reading: What is DNA made of?” half-sheet here.

Name _____ Period _____ Date _____

What Is DNA Made Of? (continued)

SketchNotes: DNA Structure

Sketch the DNA ladder. Label the backbone and the four bases (A, T, C, G). Use color, not sentences.

Sensemaking: The Siamese Cat Path

Add what you learned about DNA's structure to your cat drawing.

Exit Ticket

Name _____ Period _____ Date _____

What Can One Letter Do?

Focus question: Does every change in DNA matter?

Vocabulary

Word	Definition (my words)	This reminds me of… (connections)	Example	Drawing
base				
amino acid				
protein				

Glue in: Card sort

Glue the Day 4 “Card sort” half-sheet here.

Name _____ Period _____ Date _____

What Can One Letter Do? (continued)

SketchNotes: Bases to Amino Acids

Show how a 3-base code picks an amino acid and how amino acids link into a protein.

Sensemaking: The Siamese Cat Path

Add how one changed base could change a protein, then keep adding after each lesson.

Exit Ticket

Name _____ Period _____ Date _____

Same DNA, Different Jobs

Focus question: Why are only some parts of a Siamese cat dark?

Vocabulary

Word	Definition (my words)	This reminds me of… (connections)	Example	Drawing
gene				
protein				
job				

Glue in: Same DNA, different jobs

Glue the Day 5 “Same DNA, different jobs” half-sheet here.

Name _____ Period _____ Date _____

Same DNA, Different Jobs (continued)

SketchNotes: Same DNA, Different Jobs

Draw two cells with the same DNA but different proteins and different jobs.

Sensemaking: The Siamese Cat Path

Add why only the ears, paws, and tail are dark.

Exit Ticket

Name _____ Period _____ Date _____

Case Data

Focus question: How can one DNA letter change the body?

Vocabulary

Word	Definition (my words)	This reminds me of… (connections)	Example	Drawing
claim				
evidence				
reasoning				

Glue in: Case data

Glue the Day 6 “Case data” half-sheet here.

Name _____ Period _____ Date _____

Case Data (continued)

SketchNotes: Claim, Evidence, Reasoning

Write your claim, list or draw the data that backs it, then the reasoning that links them.

Sensemaking: The Case Path

Add how one DNA change can change the body.

Exit Ticket

Name _____ Period _____ Date _____

Review and Back to the Cat

Focus question: Why are a Siamese cat's points dark?

Vocabulary

Word	Definition (my words)	This reminds me of… (connections)	Example	Drawing
DNA				
gene				
protein				
amino acid				

Glue in: Write It: two Siamese kittens

Glue the Day 7 “Write It: two Siamese kittens” half-sheet here.

Name _____ Period _____ Date _____

Review and Back to the Cat (continued)

SketchNotes: DNA to Trait

Sketch the whole path from DNA to gene to protein to what you see.

Sensemaking: The Siamese Cat Path

Finish your cat path with every step from DNA to dark fur.
