Unit 3.1 Printables and Glue-Ins Needed

All pages are in the **Unit 3.1 Student Notebook Printout**, grouped by day. Every ID matches the dashed "glue in" box on that day's notebook setup slide and the orange tag on the lesson slide. Copies assume 32 students.

Print checklist

ID	Day	Printable	Notebook page	Copies	Prep
U-1	1	Unit CER page: question, claim, evidence log	New page	32	Trim; students add a row each day
U-2	1	Frayer card sheet (8 words)	Homework; keep in notebook	32	Hand out Day 1
D1-D	1	Hook data: ocean-floor and continent ages	Left	32	Cut the two tables apart
D1-A	1	Site list for plotting	Left, beside the map	16	Per pair; not glued
D1-B	1	Plate boundary table	Right	32	Trim
D2-A	2	Seafloor ages table and color key	Left	32	Trim
D2-B	2	13-box seafloor strip	Left	32	Trim
D2-C	2	Graph grid: age vs. distance	Right	32	Trim
D2-D	2	North America ages table and 5-box strip	Right	32	Trim
D3-A	3	Crater counts and three questions	Left	32	Trim
D3-B	3	Timeline table and old materials table	Right	32	Trim; strip itself is adding-machine tape
D4-A	4	Guided notes with blanks	Left	32	Trim
D4-B	4	Density table	Left	32	Trim
D4-C	4	SketchNotes checklist	Right	32	Trim
D5-A	5	Magnetic stripe band table	Left	32	Trim
D5-B	5	Hawaii and GPS table with rate blanks	Right	32	Trim
D5-C	5	Fossil table	Right	32	Trim

D5-D	5	Evaluate-the-evidence table	Right	32	Trim
D6-E	6	Three buckets for sorting evidence	Left	32	Trim
D6-A	6	Part A sentence frames	Left	32	Trim
D6-D	6	Peer feedback (star and step)	Right	32	Trim
D6-B	6	Six evidence cards	Right	32	Students cut apart and sort
D6-C	6	Part B story frames	Right	32	Trim
D7-A	7	Self-rating chart for the five priority targets	Left	32	Trim

Not in the student printout

Item	Day	Copies	Note
World map with latitude and longitude lines	1	32	Students plot on it and tape it into the notebook (D1-A box)
Plate boundaries map	1	Project	Shown on the slide
Continent cut-outs for the Pangaea puzzle (South America, Africa, India, Australia, Antarctica)	5	8 sets or 1 per pair	Pre-cut; the Building Pangaea Gizmo is an optional alternate
45 cm strips of adding-machine tape	3	16	Plain paper strips also work
12 cm paper strips, 2 per student, and a folded sheet with a slit	5	32	For the magnetic-stripe model
Plain paper for SketchNotes	4	32	A half page of notes and a full page of drawing

Lab supplies (clay, balances, tubs, blocks) are in the Lab Materials and Set-Ups doc. The Day 3 crater lab is now a slide simulation, so it needs no print or supplies.

Prep and glue-in routine

1. Print one day at a time from the student printout, 32 copies each (or print the whole unit once if you copy double-sided).
2. Trim each glue-in at its heading. Sort the pieces into one labeled tray per ID so students can pick up what the slide names.
3. At the start of each lab day, the notebook setup slide shows which dashed box each ID goes in. Students glue first, then start the lab.
4. Use glue sticks for small pieces and tape for the map (D1-A) and the Pangaea puzzle (D5-C).
5. Glue-in time target: under 2 minutes. If a class runs behind, hand out only the pieces for the first lab and the rest during transitions.

6. Students fill in blank rows with pencil. Ask them to keep the tables on the slide as a check, not to copy them.
